

CYBER INCIDENT MANAGEMENT

ONE DAY - NON TECHNICAL BOOTCAMP

*“Executive
Strategies in
Planning and
Responding to
Cyber Attacks”*

CYBER INCIDENT MANAGEMENT

ONE DAY - NON TECHNICAL BOOTCAMP

Course Overview

Cyber attacks have become mainstream. Is it now not a matter of “If” but “When” and in many cases it is actually a case of are we already breached?

This Non Technical course is designed specifically for senior executives that wish to understand what is involved in planning for and responding to cyber attacks. Key takeaways includes developing an “Action pack” to bring back to the office in order to quickly assess and mature your cyber response capability.

Delegates will gain a full understanding of:

- Basic Concepts of Cyber attacks, Incidents and Threat Intelligence
- Key components of designing and implementing a response framework
- How to build an effective cyber response team
- Legal Implications and Cyber Insurance Aspects

- Dealing with related key stakeholders:
 - Cyber Threat Intelligence
 - Law Enforcement
 - Regulators
 - PR and Media
 - Cyber Legal Counsel
 - Digital Forensics & eDiscovery

The one day course culminates in a table top exercise walking delegates through a cyber incident.

4 Modules:

- Incident Resilience Planning & Strategy
- Detection Response & Mitigation
- Escalation & Reporting
- TTX – Table Top Exercise

Who Is The Course For?

- CIO, CTO and IT Directors
- Project Managers and BCP Managers
- IT Managers and Service Managers
- Mid to Senior IT Administrator and Network Managers
- Change and Incident Managers
- Head of Audit & Senior Auditors
- Information Security Managers
- Head of Security Legal and compliance
