# COMPANY OVERVIEW

**Cyber Risk International believes the answer to the cyber challenge is leadership. We provide a portfolio of services to enable and empower leadership within organisations so they can understand, mitigate and manage cyber risk.**

Providing board level briefings, interim CISO's and executive mentoring enables our clients to develop an appropriate cyber strategy and framework.

We understand every organisation is unique and our approach is to marry risk management with cyber security so that you can effectively leverage and augment your existing investment.

We deal with all sectors and specialise in supporting the global financial sector.

Our award winning Cyber Risk Strategy "CyberPrism™" is now available as a software tool and our clients can avail of the derived benefits of this RegTech approach.

Aligning a cyber strategy to the business is essential for the board and CRI specialises in calculating the inherent cyber risk of organisations based on their business model and thus developing an appropriate strategy and framework.

No matter what industry you are in, the board and leadership is ultimately responsible for the holistic landscape of cyber risk.

Cyber risk oversight is a board imperative and we assist global corporations to develop an appropriate governance model that supports execution of their business strategy.

## ASSESSMENTS

We can assess your current cyber risk status from a strategic, management and technical perspective. Most assessments are carried out utilising our award winning cyber assessment tool CyberPrism™. Every organisation is unique and we can tailor our approach to fit your requirements and budget.

## BOARD ADVISORY

Our board advisory services range from board briefings to ongoing independent advisors being appointed to provide regular updates, advice and impartial governance. We also provide one to one specialist advisory sessions on topics such as geopolitics, cloud transition and M&A activities.

## EXEC EDUCATION

We provide a range of public and private courses designed specifically for executives. From bootcamp style masterclass to interactive workshops our topics range from Cyber Incident Management, Cyber Compliance for FinSec to our flagship CISO Bootcamp. Private courses and bespoke topics can also be facilitated.

## RESOURCES

Highly experienced, vetted and qualified cyber experts are a challenge for every organisation to resource. From interim CISO's to subject matter experts we provide access to our cadre of internal experts and associates so clients can leverage teams and resources as required. We can provide instant short, medium or long term access to cyber teams.
